EXPERIENCE SUMMARY

2021–2025

Senior Engineering Manager

INFRASTRUCTURE MODERNIZATION AT SADA · Remote

- Launched a new office in Yerevan, Armenia; hired and trained 12–15 engineers; aligned distributed delivery across the US, Canada, India, Armenia, and UK/Ireland (cadence, staffing, handoffs); established best practices for distributed delivery.
- Launched and productized 5 Infrastructure Modernization offerings (scope, packaging, GTM); produced sales enablement and marketing collateral.
- Sustained Google Cloud Infrastructure Modernization Partner Specialization through biennial audits and renewals over 7 years.
- Owned pursuits and closed engagements; ran end-to-end delivery with clients and partner teams.
- Hired and coached reports; delivered training to cohorts of 10–50 (internal and client-facing).

2018–2021

Senior Cloud Infrastructure Engineer

INFRASTRUCTURE MODERNIZATION AT SADA · Remote

- Delivered migrations and greenfield builds across AWS, GCP, and Kubernetes. Embedded with clients to containerize workloads and migrate applications to cloud-native runtimes.
- Built and operated CI/CD and Infrastructure-as-Code (Terraform, Ansible, Chef, Puppet).
- Automated internal workflows (Zapier, Bash, Go); mentored peers and paired on delivery.

2017–2018

Senior Site Reliability Engineer

GRINDR, LLC · Los Angeles, CA

- Ran AWS infrastructure as code (Terraform); standardized release automation with Jenkins; reduced toil with Ansible. Packaged services as custom RPM/DEB artifacts; migrated the fleet from legacy Ubuntu to CentOS.

2016–2017

Platform Engineer

NORDSTROMRACK.COM · Los Angeles, CA

- Operated hybrid AWS and GCP infrastructure with Terraform.
- Engineered a containerized Nginx routing layer for traffic management; orchestrated provisioning with Puppet, Chef, and Foreman.
- Migrated fleet configuration from Puppet to Chef.
